

Portfolio

SKILLS

-
- **Languages:** Java, Javascript, C++, Python, Java MongoDB, Salesforce LWC, JavaScript, AJAX **Technologies:** Spring Boot, REST APIs, Microservices,

EDUCATION

-
- **RV College Of Engineering** Bengaluru, India
Bachelor of Engineering in Information Science ; GPA: 7.94 Aug. 2020 – July. 2024

EXPERIENCE

-
- **Ud Trucks India** Bengaluru, IN
Application Development Professional Jul 2025 - Present
- Designed and implemented a **scalable Java microservices architecture** using **Spring Boot** and **Spring Cloud**, supporting independent deployments, fault tolerance, and improved system resilience.
 - Developed and optimized **RESTful APIs** using **Spring WebClient** for integration with external repository services, reducing average API latency by **40%**.
 - Optimized backend data access by tuning database queries and implementing **caching strategies**, improving system throughput and reducing API response times by **28%**.
 - Integrated **secure authentication and authorization** for **Java microservices** using **Azure AD B2C**, implementing custom claims handling, policy-based access control, and centralized observability with **Application Insights**.
 - Implemented **JWT- and OAuth2-based security** across microservices using **Spring Security**, enabling secure API access and consistent user authorization.
 - Developed **unit and integration tests** using **JUnit** and **Mockito**, increasing test coverage from **60% to 90%** and reducing production defects by **35%**.
- **Ud Trucks India** Bengaluru, IN
Graduate Engineer Trainee Jul 2024 - Jul 2025
- Developed a multilingual chatbot in Salesforce LWC with dynamic greeting logic and language selector, improving engagement across English, Japanese, Thai, Indonesian, and Spanish Languages.
 - Integrated GA4 event tracking with Salesforce components, ensuring GDPR-compliant cookie handling via Cookiebot and custom JavaScript solutions.
 - Integrated Amazon Bedrock services into chatbot workflows for natural language processing and generative AI capabilities, enabling contextual and personalized responses.
 - Leveraged OpenSearch for chatbot knowledge retrieval, enabling semantic search over indexed documents and improving answer relevance by **35%**.
 - Implemented AJAX-powered real-time UI updates within Salesforce LWC, enabling seamless user interactions and reducing page reload dependencies.
 - Combined retrieval-augmented generation (RAG) techniques with Bedrock models and Open Service Search, creating a hybrid system that balances accuracy and contextual intelligence.

PROJECTS & ACHIEVEMENTS

-
- **Quantistrat:** Developed a Python package for financial data analysis and implementation of capital market strategies.
- **Longlinked:** Built an AI-powered LinkedIn automation bot to generate, schedule, and post content autonomously.
- **Clothes Vision:** Designed a rule-based wardrobe recommendation system using parameters such as occasion, season, and style preferences.
- **Competitive Programming:** Codeforces Expert with a highest rating of **1683**; achieved Global Rank **1** in Codeforces Round 1062.
